Part III DETAILED ACTION

Notice to Applicant(s)

1. This application has been examined. Claims 1-49 are pending.
2. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 2111.

Election/Restriction

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I, claims 1-47, is classified into Class 710 Subclass 306 which is drawn to interface in the data storage device.

Group II, claims 48-49, is classified into Class 360 Subclass 55 which is drawn to the method of testing an integrated circuit (IC).

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the method of testing an integrated circuit are distinct from the interface in the data storage device. The subcombination has separate utility such as the method of testing an integrated circuit with the step of selectively

multiplexing outputs of one or more of the plurality of discrete component circuit blocks with one or more I/O pins such that the integrated circuit may selectively output signals from one or more of the predetermined circuit blocks.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. ' 103 of the other invention.

4. A telephone call was made to Mr. Robert Bell (Reg. #: 34,546) on February 9, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Bell requested a written restrictions on February 9, 2004.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. ' 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. ' 1.48(b) and by the fee required under 37 C.F.R. ' 1.17(h).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner *Raymond Phan*, whose telephone number is (703) 306-2756. The examiner can normally be reached on Monday-Friday from 6:30AM- 4:00PM.

Art Unit: 2111

If attempts to reach the examiner by telephone are unsuccessful, the examiner's Primary, *Paul Myers*, can be reached on (703) 305-9656. The *fax phone number* for this Group is (703) 872-9306.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [raymond.phan@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-3900.
